

Pencil Shooter

Written By: Katzman

TOOLS:

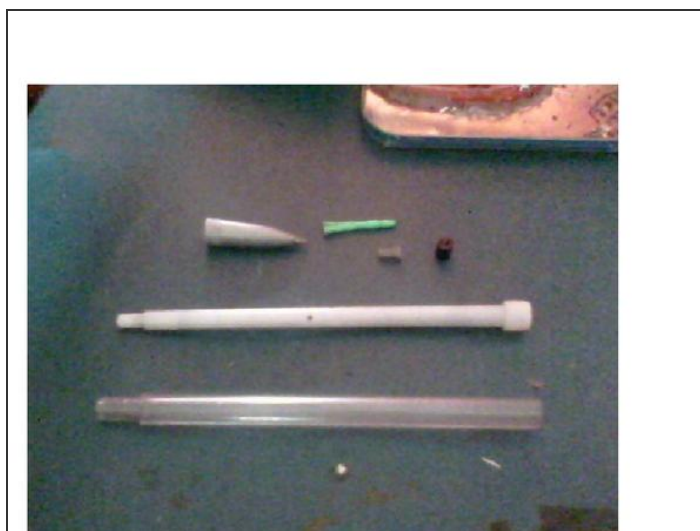

- [Hot Glue gun & hot glue \(1\)](#)
- [Scissors \(1\)](#)

PARTS:

- [Rubber band \(1\)](#)
- [Bic Mechanical Pencil \(1\)](#)
- [Paper clip \(1\)](#)
- [Unlimited Ammunition \(1\)](#)

Step 1 — Pencil Shooter

- Get a mechanical pencil.
- Disassemble the pencil.

Step 2

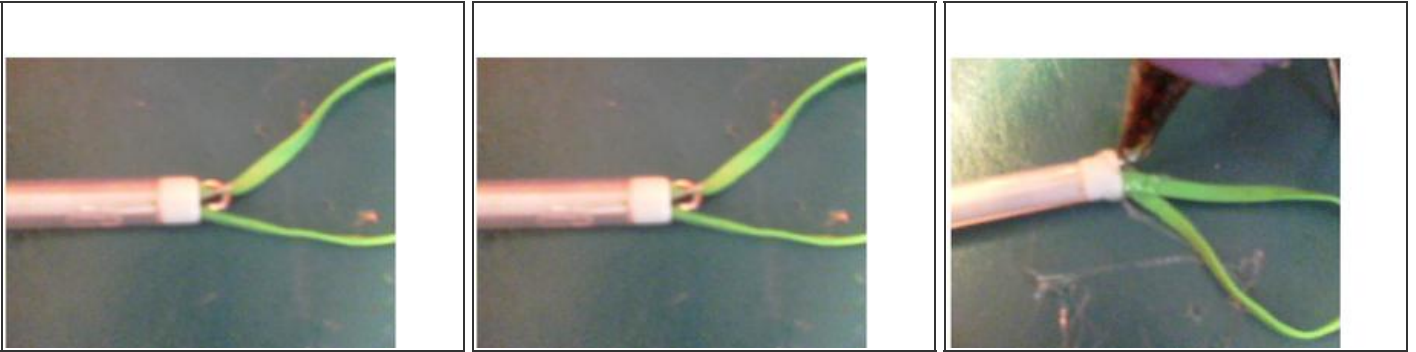

- Set up the inside and outside pieces side-by-side, having the back touch as shown.
- Mark the end of the outer piece, just leaving some space for the the inner piece to stick out.
- Cut on the marked line.

Step 3

- Set up the action.
- Bend the paperclip into a hook.
- Attach the rubber band to the hook and twist the hook to close it.

Step 4

- Place the hook (action) into the wide-end hole of the smaller piece.
- Push the action farther into the hole.
- Hot glue the action.

Step 5

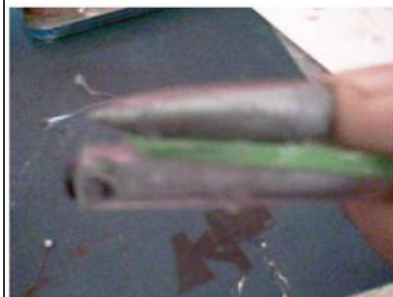

- Get the tip of the pencil.
- Set it up touching the outside piece, towards the cut end of the shooter.
- Hot glue it there.

Step 6

- Place the action (the inner piece) into the larger "barrel."
- Pull the rubber band over the glued-on tip.
- This is your final product!

Step 7

- To load and fire the gun:
- Take the back of the action and pull it back. Hold.
- Load the ammunition directly into the barrel.
- Tip up the shooter so the ammo falls back into the barrel, touching the action.
- Now, brace the shooter (you might need 2 hands) and let go!
- Successful fire!
